## MARKET PARTICIPANT SERVICE AGREEMENT

This MARKET PARTICIPANT SERVICE AGREEMENT is dated this \_\_\_\_ day of \_\_\_\_\_, \_\_\_\_\_ and is entered into by and between:

**[Name of Market Participant]** having its registered and principal place of business located at **[Address]** (the “Market Participant”);

and

**ISO New England Inc.**, a Delaware corporation having its principal place of business located at One Sullivan Road, Holyoke, MA 01040-2841, and acting as the Regional Transmission Organization for New England (“ISO”).

The Market Participant and the ISO are sometimes hereinafter referred to individually as a “Party” and collectively as the “Parties.”

### BACKGROUND

1. The ISO operates the New England Transmission System pursuant to a certain Transmission Operating Agreement dated \_\_\_\_\_, and other agreements entered into with merchant and other transmission owners. The ISO’s operation of the New England Transmission System is intended to insure the reliability of the New England Transmission System. Subject to the requirements of bulk power supply reliability, the ISO provides non-discriminatory, open access to the New England Transmission System pursuant to the ISO’s Transmission, Markets and Services Tariff on file with the Federal Energy Regulatory Commission (the “Commission”) (as amended from time to time, the “Tariff”).

2. The ISO operates competitive markets for the purchase and sale of energy, capacity, certain demand response services, certain Ancillary Services and certain related products and services pursuant to the Tariff. Accordingly, the ISO seeks to create and sustain open, non-discriminatory, competitive, unbundled markets for energy, capacity, and ancillary services (including Operating Reserves) that operate efficiently consistent with proper standards of reliability and the long-term sustainability of competitive markets.

3. The ISO operates purchase programs for certain Ancillary Services that are not procured through competitive markets. The ISO seeks to operate purchase programs for such services at rates that are intended to compensate sellers at not less than the incremental cost of providing such services and to attract and sustain adequate supplies of such services.

4. The ISO seeks to provide transparency with respect to the operation of and the pricing in markets and purchase programs to allow informed participation and encourage ongoing market improvements.

5. The ISO seeks to provide access to competitive markets within the New England Control Area and to neighboring regions.

6. The Market Participant made an application to the ISO to be eligible to participate in the markets and purchase programs for energy, capacity ancillary services and related products and services administered by the ISO.

7. The ISO has accepted the Market Participant's application.

8. The Market Participant and the ISO wish to set forth the terms and conditions upon which the ISO will provide services and the Market Participant may participate in the markets and programs administered by the ISO.
