Re: Central Maine Power Company,
June 30, 2014 Informational Filing - Annual Update to Formula
Rates Effective June 1, 2014.
Docket Nos. ER09-938-000, *et al.*

Dear Secretary Bose:

Central Maine Power Company ("CMP") hereby submits an original and six copies of the Company's Annual Informational Filing, which consists of the annual update to the Commission-approved formula rates in Schedule 21-CMP of the ISO-NE Transmission, Markets, and Services Tariff ("ISO OATT") effective June 1, 2014.

Accordingly, this informational filing reflects actual cost data for calendar year 2013 plus estimated cost data for calendar year 2014 associated with CMP's forecasted transmission plant additions and construction work in progress for CMP's Maine Power Reliability Program ("MPRP"), as well as the annual true-up and associated interest pursuant to 18 CFR § 35.19a of the Commission regulations.

CMP is submitting this filing for informational purposes only in accordance with Section 10.2 of Schedule 21-CMP of the ISO OATT.

This informational filing provides the worksheets reflecting the annual updates for Schedules 1, 13, and 14 and Attachment G and includes the following attachments:

1. Filing Letter;
2. Service List;
3. Certificate of Service;
4. Rates Effective June 1, 2014;
5. Attachment G-R;
6. Attachment G-W;

Honorable Kimberly D. Bose

June 30, 2014

Page 2 of 2

7. Schedule 1;
8. Update to CCS Charge;
9. Schedule 13;
10. Schedule 14 for Retail Customers; and
11. Schedule 14 for Wholesale Customers.
12. Annual Report of Construction Costs for MRPP

Also included with this filing is a certificate of service that verifies that copies of this filing have been sent to FERC Staff and the Maine Public Utilities Commission.

All correspondence and communications regarding this proceeding should be directed to:

13	Total Local Network Load 1,423,745
15	ATRR ws 1, line 28 \$ 49,155,775
17	Rate \$/kW-yr (line 15/13) \$ 34.53

RATE DESIGN FORMULA:

ATRR/(NPTFNL+(PTFNL X ATYP)) where:

ATRR = Annual Transmission Revenue Requirement
NPTFNL = Non-PTF Network Load
PTFNL = PTF Network Load
ATYP = Applicable Transition Year Percentage (Sch. 11)

RATE DESIGN PROOF:		Total	Rate	ATYP	Network load	# months
27	Recovery from Non-PTF connected Customers	\$ 49,155,775	= \$ 34.526	x 100%	x 1,423,745	x 12/12
28	Recovery from PTF Connected Customers -last 9 months of Transition yr 10	-	= \$ 34.526	x 0%	x 49,448	x 9/12
29	Recovery from PTF Connected Customers -1st 3 months of Transition yr 11	-	= \$ 34.526	x 0%	x 49,448	x 3/12
31	Total Recovery	\$ 49,155,775				
32	Rounding differences	0				

FIRM POINT TO POINT RATES: (See Sch. 7 for Wheeling Out Rate)	
34	Per Year (Line 17) \$ 34.5257
35	Per Month (Line 34 divided by 12 months) \$ 2.8771
36	Per Week (Line 34 divided by 52 weeks) \$ 0.6640
37	Per Day (Line 36 divided by 5 days) \$ 0.1328

NON-FIRM POINT TO POINT RATES:	
40	Per Year (Line 17) \$ 34.5257
41	Per Month (Line 40 divided by 12 months) \$ 2.8771
42	Per Week (Line 40 divided by 52 weeks) \$ 0.6640
43	Per Day (Line 42 divided by 7days) \$ 0.0949
44	Per Hour (Line 43 divided by 24 hours) \$ 0.0040

**PART I – SUMMARY OF CONSTRUCTION COSTS
FOR FERC INFORMATIONAL FILINGS**

Summary of MPRP Costs for the 2013 FERC Informational Filings

1. The actual amount of CWIP recorded each month for the MPRP project for the most recent calendar year.

Attachment 1 provides the actual amount of CWIP recorded each month for the MPRP project for 2013.

The Lewiston Loop represents a collection of projects within the MPRP that were classified as Deferred by the Maine Public Utilities Commission (MPUC) Order on June 10, 2010. CMP continued with planning and preliminary engineering for the Lewiston Loop and on August 23, 2013 received a Certificate of Public Convenience and Necessity (CPCN) from the MPUC. The Lewiston Loop projects are reclassified from Deferred to Approved in this report with additional estimated costs identified during the regulatory approval process assigned as Scope Change. Costs incurred during the regulatory approval process have been reclassified as CWIP.

2. Forecast of the year end MPRP CWIP balance for the current calendar year.

CMP estimates the year-end 2014 MPRP CWIP balance will be \$323,050,642 for PTF facilities with \$6,409,913 for non-PTF facilities.

3. A summary and detail of accounting transfers between MPRP CWIP and Plant in Service.

Attachment 1 provides a summary of the MPRP monthly account additions and reclassifications between CWIP and Plant in Service for the MPRP in 2013.

4. A statement of the current status of the MPRP projects and estimated in-service dates for the program.

Below is a summary of the actual and forecast annual in-service values and costs for the MPRP categorized by PTF, Non-PTF, distribution, retirement and general plant.

MPRP In-Service, Retirement and General Plant Projections (\$ in thousands)							
Year	CMP PTF	BHE/MEPCO PTF	CMP Non-PTF	CMP Distribution	Retirement	General Plant	Total
2009	\$22,435	\$0	\$0	\$0	\$0	\$0	\$22,435
2010	\$4,674	\$0	\$709	\$0	\$0	\$0	\$5,383
2011	\$26,798	\$0	\$2,453	\$1,948	\$3,636	\$0	\$34,835
2012	\$213,016	\$0	\$13,260	\$1,835	\$11,567	\$1,113	\$240,791
2013	\$311,360	\$17,058	\$10,050	\$1,892	\$5,048	-\$912	\$344,496
2014	\$278,209	\$9,500	\$2,423	\$300	\$3,500	\$1,500	\$295,432
2015	\$376,264	\$9,986	\$6,154	\$4,918	\$1,250	\$250	\$398,822
2016	\$62,821	\$0	\$5,831	\$2,700	\$500	\$100	\$71,952
Total:	\$1,295,577	\$36,544	\$40,880	\$13,593	\$25,501	\$2,051	\$1,414,146

The total cost estimate for projects within the MPRP (as included in the ISO-NE Transmission Cost Allocation approval) that are approved by the MPUC, including scope change and contingency, is \$1,424,538,000. The current forecast anticipates that the Program can be constructed within the original cost estimate and the addition of the revised Lewiston Loop estimates prepared during the regulatory process.

Additional projects related to the MPRP that are still in the Planning and Regulatory approval process are estimated at \$84,202,000. These projects currently include:

1. Sections 80 rebuild (Mid-Coast)
2. Section 84 rebuilds
3. New 115kV Section 244 (Mid-Coast)
4. Various line upgrades and substation expansions

Portions of the projects listed above will need to be constructed under the classifications of “Remote Ends” or “Line Terminations”. Those project costs are incorporated in the project forecast contained in the prior table.

5. Project cost estimates in a format similar to ISO-NE annual cost updates.

Attachment 2 provides cost estimate updates for MPRP projects approved by the MPUC, additional projects that are undergoing continued planning, preliminary engineering and regulatory approval and the combined cost estimates for the MPRP as a whole.

ATTACHMENT 2 – PROJECT COST ESTIMATE UPDATE SHEETS

FIGURE 1 – TOTAL MPRP PROJECT FORECAST

APPROVED AND ADDITIONAL PROJECT COST ESTIMATE UPDATE SHEET

Transmission Owner:	Central Maine Power Co.	RSP Project #:	Various
Project Name:	MPRP	Estimate Grade:	D (Construction)
Base Estimate:	\$ 1,284,307	PPA Approval:	
TCA Application #:	CMP-08-TCA-01 & CMP-10-TCA-01	Date:	5/31/2014

1. Project Scope Summary

Central Maine Power is modernizing its 40 year-old bulk power transmission system by investing between \$1.4 and \$1.5 billion in new construction. The proposed improvements are intended to maintain reliability over the coming decades and to provide the infrastructure necessary to facilitate the state's emerging wind, hydro, biomass and tidal energy industries. The Maine Power Reliability Program will improve the company's electric transmission network primarily between the towns of Eliot and Orrington where it interconnects to transmission systems in northern and eastern Maine. The Program is segregated into logical construction areas referred to as the Northern Loop, Central Loop, Southern Loop and Southern Connector.

2. Project Update

The MPRP received its ISO-NE determination letter in January 2010. The Certificate of Public Convenience and Necessity (CPCN) from the Maine Public Utilities Commission (MPUC) was approved with stipulation on June 10, 2010 followed by subsequent approvals in 2011 and 2013. Approvals by the Maine Department of Environmental Protection (MDEP) were received on April 5, 2010 and the by the Army Corps of Engineers (ACOE) on July 21, 2010. Approximately 96% of materials have been received with substation and transmission line construction progressing as planned. The Outage Sequence Plan continues to influence the construction and energization schedules. Program risk is evaluated and adjusted monthly. Current forecasts reflect contract amounts, approved change orders, T&M contract projections and anticipated future risk. The values represented in this update include projections of costs associated with Lewiston Loop, which received its CPCN in August 2013.

3. Project Cost Summary

Central Maine Power - Maine Power Reliability Program

Project Name:	MPRP	Estimate Grade:	D (Construction)
Base Estimate:	\$ 1,211,893	PPA Approval:	
TCA Application #:	CMP-08-TCA-01 & CMP-10-TCA-01	Date:	5/31/2014

1. Project Scope Summary

Central Maine Power is modernizing its 40 year-old bulk power transmission system by investing between \$1.4 and \$1.5 billion in new construction. The proposed improvements are intended to maintain reliability over the coming decades and to provide the infrastructure necessary to facilitate the state's emerging wind, hydro, biomass and tidal energy industries. The Maine Power Reliability Program will improve the company's electric transmission network primarily between the towns of Eliot and Orrington where it interconnects to transmission systems in northern and eastern Maine. The Program is segregated into logical construction areas referred to as the Northern Loop, Central Loop, Southern Loop and Southern Connector.

2. Project Update

The MPRP received its ISO-NE determination letter in January 2010. The Certificate of Public Convenience and Necessity (CPCN) from the Maine Public Utilities Commission (MPUC) was approved with stipulation on June 10, 2010 followed by subsequent approvals in 2011 and 2013. Approvals by the Maine Department of Environmental Protection (MDEP) were received on April 5, 2010 and the by the Army Corps of Engineers (ACOE) on July 21, 2010. Approximately 96% of materials have been received with substation and transmission line construction progressing as planned. The Outage Sequence Plan continues to influence the construction and energization schedules. Program risk is evaluated and adjusted monthly. Current forecasts reflect contract amounts, approved change orders, T&M contract projections and anticipated future risk. The values represented in this update include projections of costs associated with Lewiston Loop, which received its Certificate of Public Convenience and Necessity (CPCN) in August 2013.

3. Project Cost Summary

Central Maine Power - Maine Power Reliability Program \$/1000							
Project MPRP Components	Base Estimate	Base Estimate With Contingency	Scope Change	Actual Costs	Project Forecast	Estimated % Completion	Forecast vs. Estimate
2.2.1 New 345KV Lines	\$ 387,999	\$ 448,684	\$ -	\$ 338,063	\$ 458,056	74%	\$ 9,372
