Subject: Greater Boston Circuit Breaker Project Proposed Plan Applications (PPAs) ES-15-T62, ES-15-T63, ES-15-T64, ES-15-T65

Dear Ms. Leonard:

This letter is to inform you that, pursuant to review under Section I.3.9 of the ISO Tariff, no significant adverse effect has been identified with regard to the following PPAs:

ES-15-T62, ES-15-T63, ES-15-T64, ES-15-T65 – Transmission applications from Eversource Energy (ES) for the Greater Boston Circuit Breaker Project

The in-service date of ES-15-T62 and ES-15-T64 is December 2016. The in-service date of ES-15-T63 is December 2015 and the in-service date of ES-15-T65 is June 2017. The Reliability Committee (RC) reviewed the materials presented in support of the proposed project and did not identify a significant adverse effect on the reliability or operating characteristics of the transmission facilities of ES, the transmission facilities of another Transmission Owner or the system of any other Market Participant.

Having given due consideration to the RC review, ISO New England has determined that implementation of the plan will not have a significant adverse effect upon the reliability or operating characteristics of the Transmission Owner's transmission facilities, the transmission facilities of another Transmission Owner, or the system of a Market Participant.

A determination under Section I.3.9 of the ISO Tariff is limited to a review of the reliability impacts of a proposed project as submitted by Participants and does not constitute an approval of a proposed project under any other provisions of the ISO Tariff.

Sincerely,

A handwritten signature in black ink, appearing to read "Stephen J. Rourke", written over a circular stamp or seal.

Stephen J. Rourke
Vice President, System Planning
