

Summer Internship Program

Be a part of the clean energy transition.

An internship with an impact.

For 11 weeks this summer, you can contribute to groundbreaking projects that will help New England work towards a smarter, greener, more reliable power grid.

You'll do real work in your area of study, experience the inner workings of a large, thriving, not-for-profit organization, and build your skill set in an ever-changing industry.

We're hiring:

- Power System Engineers
- Electrical Engineers
- Economists
- Data Analysts
- Software Developers
- Computer Scientists

Perks of the internship program:

- ☒ Hybrid work environment*
- ☒ Paid internship
- ☒ Housing stipend
- ☒ Industry field trips
- ☒ Real-world experience

*includes most departments
