Mr. Mathew Preston  
Eversource Energy  
56 Prospect St  
Harford, Connecticut 06103

Subject: Greenskies Clean Energy LLC, 356 CT-2 Solar – Proposed Plan Application (PPA) – ES-24-G55

Dear Mr. Preston,

This letter is to inform you that, pursuant to review under Section I.3.9 of the ISO Tariff, no significant adverse effect has been identified with regard to the following PPA:

**ES-24-G55** – Generator application from Eversource Energy (ES) on behalf of Greenskies Clean Energy LLC for the 2.75 MW Solar PV in Preston, CT and interconnecting to 356 CT-2, Preston, CT via Circuit 11B2 out of Gales Ferry Station. Proposed in-service date is June 30, 2025. The Reliability Committee (RC) reviewed the materials presented in support of the proposed project and did not identify a significant adverse effect on the reliability or operating characteristics of its transmission facilities, the transmission facilities of another Transmission Owner or the system of any other Market Participant.

Having given due consideration to the RC review, ISO New England has determined that implementation of the plan will not have a significant adverse effect upon the reliability or operating characteristics of the Transmission Owner's transmission facilities, the transmission facilities of another Transmission Owner, or the system of a Market Participant. A determination under Section I.3.9 of the ISO Tariff is limited to a review of the reliability impacts of a proposed project as submitted by Participants and does not constitute an approval of a proposed project under any other provisions of the ISO Tariff.

Sincerely,

/s/ Al McBride

Alan McBride
