

To: NEPOOL Reliability Committee (RC)

From: Anthony Stevens, Senior Business Analyst, Operations Training & Procedures

Date: January 15, 2025

Subject: OP-23 Appendix G – Reactive Resources Required to Perform Reactive Capability Auditing

The ISO is requesting a vote on its proposed revisions to Operating Procedure 23, Appendix G – Reactive Resources Required to Perform Reactive Capability Auditing (OP-23G).

The proposed revisions to OP-23G are primarily focused on clarifying the list of Reactive Resources that are required to test under Market Rule 1 and consolidate the relevant data for Reactive Capability Audits on the ISO's website. These revisions are designed to provide clarity and a source of information for Market Participants that own resources that are required to perform reactive capability testing under Market Rule 1.

The proposal for the Reliability Committee's consideration at their January RC meeting has been presented on the meeting dates outlined below:

- December 17, 2024; [agenda item #8.3](#)
