Subject: 2024 Economic Study Survey to Support March Lessons Learned Discussion

ISO New England has issued [a public survey](#) to gather stakeholder input that will help shape the Economic Study lessons learned discussion planned for the March 2026 PAC meeting. [The survey was announced at today's January PAC meeting](#) and is now available for all interested parties to complete.

The purpose of this effort is to engage stakeholders and the public in reviewing past Economic Studies, identifying areas for improvement, and addressing open questions. Feedback collected through the survey will help inform the ISO's review of study inputs, modeling methods, communication practices, and potential enhancements for future Economic Studies.

The survey will remain open for two weeks, closing Tuesday, February 10, 2026 at 5 PM EST. The ISO will compile and provide the PAC with all written comments submitted through the survey. The Economic Study Lessons Learned discussion is scheduled for the March 2026 PAC meeting.
