Roles & Responsibilities at Activation

Important Reminder

Activation changes participation status. It does not change operating restrictions established through interconnection agreements.

Roles	After Commercial Operation
ISO New England (ISO-NE)	Market operations
Aggregator	Participation and coordination
Distributed Energy Resources (DERs)	Physical response
Host Utility	Distribution reliability
Local Control Center (LCC)	Existing reliability coordination

In case of discrepancy between training provided by ISO and the Tariff or Procedures, the meaning of the Tariff and Procedures shall govern.
