To: Participants Committee

From: Daniel Patnaude, Secretary, Reliability Committee

Date: November 3, 2026

Subject: Actions of the Reliability Committee from the November 3, 2026 Meeting

This memo is to notify the Participants Committee ("PC") of the actions taken by the Reliability Committee ("RC") at its November 3, 2026 meeting of the Joint Reliability Committee and Transmission Committee. A quorum was established.

(Agenda Item 2.0) (60.00% Vote) – New England Large Load Show Cause Order (EL26-72)

ACTION: APPROVED

The following motion was moved and seconded by the Reliability Committee:

Resolved, that the Reliability Committee recommends the Participants Committee support the proposed changes to Section I and III of the ISO's Transmission, Markets, and Services Tariff, including Section I.2.2 defined term changes and revisions to Section III.12 of Market Rule 1, to meet the requirements set forth in FERC's June 18, 2026 show cause order to address the integration of large and co-located loads, as distributed to the Committee for its November 3, 2026 meeting, together with any further changes recommended by this Committee, and such further non-substantive changes as the Chair and Vice-Chair of the Transmission Committee may approve.

Based on a show of hands, the motion passed with two opposed (1 Generation, 1 Supplier) and four abstentions (1 Generation, 1 Supplier, 1 Alternative Resource, 1 End User).
