

Registering Physical Load with ISO-NE: Instructions for Energy Service Companies (ESCOs)/Competitive Suppliers

Before registering a load asset with ISO-NE, the ESCO must:

1. Coordinate with the applicable electric distribution company (**DistCo**) to:
 - Review retail enrollment processes with the DistCo prior to enrollment activities
 - Register as a licensed ESCO with the DistCo
 - Participate in required DistCo supplier services training
 - Obtain a supplier ID from the DistCo
 - Be instructed by the DistCo to obtain one or more load asset IDs for the service area
 - A load asset may be structured to a specific, singular physical load or to an aggregation of multiple physical loads
2. Determine wholesale market representation for the load asset by either:
 - Becoming a market participant
<https://www.iso-ne.com/participate/applications-status-changes/new-registration/registration-checklist>

OR

 - Contracting with an existing market participant
<https://www.iso-ne.com/participate/participant-asset-listings/directory/>
3. Obtain approval from the DistCo on the initial Load Asset registration:
 - Reference the Load Asset section of the Asset Registration [webpage](#) for training materials on how to register a Load Asset using the Customer Asset Management Systems (CAMS)
 - Contact ISO-NE Participant Support (askiso@iso-ne.com) if you have additional questions in registering physical load.

There are firm deadlines in obtaining a supplier license and testing requirements for the Electronic Data Interchange (EDI) and Electronic Business Transaction (EBTs) platform. Contact the applicable DistCo for onboarding and timing requirements. Not meeting the requirements may affect the ability of the ESCO:

- To register a physical load with ISO-NE may be delayed
- To supply physical load in the DistCo service area may be at risk
