

Gen Asset with FCM Resource Retirement Questionnaire

This questionnaire aims to ensure all necessary actions are taken so that you can successfully retire your modeled or settlement only generator asset that is mapped to a FCM Resource. If required tasks are incomplete then the retirement request will be rejected.

Review Questions

1. Does the Capacity Resource have any Capacity Supply Obligations (CSO) after the requested retirement effective date?
 - ➔ If 'Yes,' the Generator asset **is not eligible** for retirement until the Resource has successfully shed **all*** remaining CSO after the requested retirement effective date.

***CSO value must be 0.00 (cannot be negative or positive)**
 - ➔ If 'No,' proceed to Question 2.
2. Does the Capacity Resource have a cleared Permanent De-List Bid, Retirement De-List Bid, or Substitution Auction Demand Bid?
 - ➔ If 'Yes,' no additional checks are required. Proceed with the asset retirement. Submit the request via CAMS.
 - ➔ If 'No,' then proceed to Question 3.
3. Has a Permanent De-List Bid or Retirement De-List Bid request been submitted?
 - ➔ If 'No,' the generator asset is not eligible for retirement.
 - ➔ If 'Yes,' then proceed to Question 4.
4. Is the Permanent De-List Bid or Retirement De-List Bid still under review, or has Unconditional Treatment been selected?
 - ➔ If still under review, the generation asset is not eligible for retirement until Unconditional Treatment has been selected pursuant to Section III.13.1.2.4.1. of the Tariff.
 - ➔ If Unconditional Treatment has been selected, no additional checks are required. Proceed with the asset retirement. Submit the request via CAMS.
