collectively as the “Parties.”

BACKGROUND

A. The ISO operates the New England Transmission System pursuant to a certain Transmission
Operating Agreement dated February 1, 2005, and other agreements entered into with merchant and other
transmission owners. The ISO’s operation of the New England Transmission System is intended to
insure the reliability of the New England Transmission System. Subject to the requirements of bulk
power supply reliability, the ISO provides non-discriminatory, open access to the New England
Transmission System pursuant to the ISO’s Transmission, Markets and Services Tariff on file with the
Federal Energy Regulatory Commission (the “Commission”) (as amended from time to time, the
“Tariff”).

B. The ISO operates competitive markets for the purchase and sale of energy, capacity, FTRs,
certain demand response services, and certain Ancillary Services. The ISO also offers other related
products, services and transactions pursuant to the Tariff. The ISO is the Counterparty with respect to
transactions involving these markets, products, and services. Accordingly, the ISO seeks to create and
sustain open, non-discriminatory, competitive, unbundled markets for energy, capacity, and ancillary
services (including Operating Reserves) that operate efficiently consistent with proper standards of
reliability and the long-term sustainability of competitive markets.
C. The ISO operates purchase programs for certain Ancillary Services that are not procured through competitive markets. The ISO seeks to operate purchase programs for such services at rates that are intended to compensate sellers at not less than the incremental cost of providing such services and to attract and sustain adequate supplies of such services.

D. The ISO seeks to provide transparency with respect to the operation of and the pricing in markets and purchase programs to allow informed participation and encourage ongoing market improvements.

E. The ISO seeks to provide access to competitive markets within the New England Control Area and to neighboring regions.

F. The Market Participant made an application to the ISO to be eligible to participate in the markets and purchase programs for energy, capacity ancillary services and related products and services administered by the ISO (or, if it is a FTR-Only Customer, solely as a purchaser or seller of FTRs).

G. The ISO has accepted the Market Participant’s application.

H. The Market Participant and the ISO wish to set forth the terms and conditions upon which the ISO will provide services and the Market Participant may participate in the markets and programs administered by the ISO.
