

Nodes Constituting the Hub

Hub prices are the simple average of the LMPs at the Nodes specified in the table below and are calculated for both the Day-Ahead Energy Market and the Real-Time Energy Market. The ISO has selected the busses to be included within the Hub in accordance with the criteria specified in Section III.2.8 of Market Rule 1.

345 kV	230 kV	115 kV	13.8 kV	13.2 kV
